This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PURE COD-LIVER OIL.

Manufactured on the Sea-shore from Fresh and Selected Livers.

The universal demand for Cod-Liver Oil that can be depended upon as strictly pure and scientifically prepared, having been long felt by the Medical Profession, we were induced to undertake its manufacture at the Fishing Stations where the fish are brought to land every few hours, and the Livers consequently are in great perfection.

This oil is manufactured by us on the sea-shore, with the greatest care, from fresh, healthy Livers, of the Cod only, without the aid of any chemicals, by the simplest possible process and lowest temperature by which the Oil can be separated from the cells of the Livers. It is nearly devoid of color, odor and flavor—having a bland fish-like, and to most persons not unpleasant taste. It is so sweet and pure that it can be retained by the stomach when other kinds fail, and patients soon become fond of it.

The secret of making good Cod-Liver Oil lies in the proper application of the proper degree of heat; too much or too little will seriously injure the quality. Great attention to cleanliness is absolutely necessary to produce sweet Cod-Liver Oil. The rancid oil found in the market is the make of manufacturers who are careless about these matters.

Prof. PARKER, of New York, says: "I have tried almost every other manufacturer's Oil, and give yours the decided preference."

Prof. HAYS, State Assayer of Massachusetts, after a full analysis of it, says: "It is the best for foreign or domestic use."

After years of experimenting, the Medical Profession of Europe and America, who have studied the effects of different Cod-Liver Oils, have unanimously decided the light straw-colored Cod-Liver Oil to be far superior to any of the brown oils.

SURGICAL INSTRUMENT DEPARTMENT.

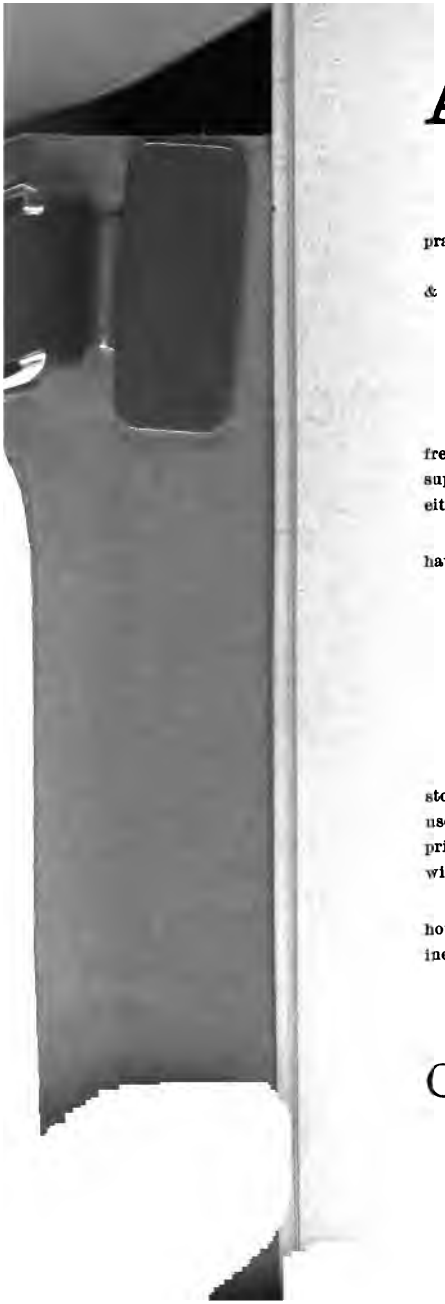
CASWELL, HAZARD & CO.,

FAMILY AND MANUFACTURING CHEMISTS, NEW YORK.



ANIMAL VACCINE.

The undersigned respectfully announces that he has discontinued the practice of furnishing Vaccine *at his residence.*

You can obtain the **Animal Vaccine** of Messrs. CASWELL, HAZARD & CO., Broadway, corner Twenty-fourth street.

FRANK P. FOSTER, M.D.

We have an arrangement with Dr. Foster by which we receive this Vaccine fresh, daily, and exchange any that is six days old. By this arrangement all supplied by us is absolutely fresh. We can furnish it in any quantity desired, either by express or by mail, if remittance is made to cover postage.

This Animal Vaccine of Dr. Foster's is the only kind that may be said to have the unqualified endorsement of the medical profession of New York.

QUILL SLIPS.

Half quill, charged on convex surface, at square-cut end, 25 cents.

For ordinary use, QUILL SLIPS are the most reliable of all forms of stored Vaccine, and in cases of failure with them in *primary* vaccination, if used within one week of their issue, and strictly in accordance with the printed directions, being in the mean time kept cool and dry, a second supply will be furnished gratis.

CRUSTS are not recommended and are not sold, for the reason that, however fresh and however well formed they may be, they are apt to prove inefficient.

It is customary for the money to accompany the order.

WINE OF COCA.

A QUICK AND VERY DIFFUSIBLE STIMULANT AND TONIC.

This preparation presents in a superior form the Medicinal Virtues of the Erythroxylon or Coca Plant, of Peru, South America, with Pure Grape Wine.

It is a powerful Muscular and Nerve Tonic, giving unusual Power of Endurance in both Mental and Physical Labor; it is also remarkable in its Food-replacing Power, persons being able to abstain from Food for many hours after a full dose of this Wine of Coca.

Its judicious daily use serves to maintain the Energies and to avert the Fatigue caused by undue Mental and Physical Exertion.

By its stimulating properties it is especially adapted to Children, Persons in Delicate Health, and Convalescents. It improves the Appetite, Aids Digestion and Assimilation, and maintains the Normal Tone of Healthy Functions. Being very Palatable, it can be borne by the most Delicate Stomach.

As a "Voice Tonic," to Public Speakers, Singers, and those who constantly use their Voice, it will be found indispensable, being a "Tensor" of the Vocal Chords, thereby Strengthening and Increasing the Volume of Voice.

Taken in small doses, repeated, WINE OF COCA will induce Sleep when Opium fails; and to those addicted to the Opium Habit and the excessive use of Coffee, it offers an Excellent and Reliable Substitute.

If taken upon rising in the morning, it Relieves the Faintness and Weariness of the Stomach, to which so many persons are subject.

DOSE.—A wineglassfull at or after meals; children one-half the dose.

TABLET TRITURATES,

Prepared by CASWELL, HAZARD & CO., according to Dr. Robert M. Fuller's Method.

(See Medical Record, March 9, 1878, and March 25, 1882.)

An easy, economical and accurate method of dispensing medicines in a compact and palatable form.

The Soluble Tablets generally consist simply of certain medicines thoroughly triturated and made into soluble paste with the aid of sugar of milk and alcohol, or water. In some instances, however, it is found necessary to employ an excipient more adhesive than sugar of milk. But in such cases, of course, as little of such excipient as possible should be used, in order that the tablet may be readily soluble in the mouth or stomach, or diffusible in a spoonful of water, and thus administered.

The tablets are intended to embrace any medicines that can be made into a paste which is not too tenacious, such as fluid extracts, or sugar of milk containing any per cent. of chemical, such as arsenious acid, sulphate of morphia, muriate of ammonia, etc. Both preparations can be made with alcohol of eighty-five per cent. or over, and pulverized acacia, according to the adhesiveness required.

These tablets from their ready solubility or diffusibility, are destined to come into general use in the profession. Their advantages can be appreciated at once when they are allowed to dissolve in the mouth or in a teaspoonful of water.

Only the purest materials are used in their manufacture.

We now manufacture these Tablets in a new, smaller and more convenient size, except those that contain tinctures, fluid extracts, or more than half a grain of medication. The first part of this list comprises the Tablets made in half grain size. They are put up in 2 oz. wide mouth glass stoppered bottles, containing one thousand Tablets each.

SOLUBLE HYPODERMIC TABLETS,

MADE ONLY BY

CASWELL, HAZARD & CO.

These tablets are readily and absolutely soluble in from five to ten minims of warm water.

They are combined with an unobjectionable base, do not cause abscesses, and may be administered by the stomach as well as hypodermically.

They possess the advantages of accuracy of dose and perfect preservation of the drug.

They are universally used by the Physicians of this section, being more convenient for use than the remedies themselves as heretofore carried by the profession.

OLIVE OIL (TABLE).

(ESPECIALLY EXPRESSED FOR IMPORTED AND BOTTLED EXCLUSIVELY BY US.)

From Murrey's "*Salads and Sauces*," by the Author of "Valuable Cooking Recipes," "Fifty Soups," etc., we clip the following:

"Having tested nearly every brand of oil on the market, sold as Olive Oil, I have found ninety per cent. of them either made from inferior olives or mixed with other oils, and therefore useless as salad oil. Last spring I happened to buy a bottle of oil from Caswell, Hazard & Co., under the Fifth Avenue Hotel, and was delighted to find that it stood the tests admirably. As a final test, I exposed the sample to light and air three months, having previously removed the cork and placed over the mouth of the bottle a thin piece of muslin. At the end of this time I sampled the oil and found it just as sweet as when I first tasted it; there was no sediment on the bottom of the bottle, and had it not been thoroughly pure, or had it been pressed from bruised or decayed olives, it could not possibly have stood the severe tests to which I subjected it."

JAMBOO OR JAMBOL (*The Seed of Syzygium Jambolanum*),

A plant, native of India, has, in the hands of Dr. Banatvala, given remarkable and uniformly successful results in Diabetes, where the daily excretion of urine and sugar was considerable. In doses of five grains, three times a day, a decided change was apparent within forty-eight hours, the daily secretion of urine was decidedly influenced, being greatly lessened in quantity, and the sugar disappearing in each case. The diet was not restricted.

From recent reports of successful cases, we feel justified in offering this new drug to the notice of physicians.

We prepare it in the form of powders and capsules, each containing five grains of the powdered seed.

IMPROVED HYPODERMIC TABLET SYRINGE.

No. 149.

This Hypodermic Syringe is specially adapted to carry an assortment of the Tablets. There are six vials, each containing six Tablets. The case measures, when closed, 3¼ inches long, 2 inches wide, and ¾ inch high.

Price, without Tablets, $3.00. Price, with Tablets, $3.50.

We print for the use of the profession a List of all our "Preparations," which will be mailed, postpaid, upon application.

A NEW HYPODERMIC SYRINGE.

By GEO. ROE LOCKWOOD, M.D., *House Physician New York Hospital.*

[*Extract from New York Medical Journal, April* 24, 1886.]

Mr. Ford, of Caswell, Hazard & Co., has recently made for me a hypodermic syringe which appears to do away with so many of the petty annoyances of the syringes now in use that I am tempted to present it to the profession. The modification consists in the fact that the piston can be readily removed from the barrel, and as readily reinserted. This is accomplished, as seen from the cut, by having the glass barrel tipped with a metal cap, which is flared outward, making thus a funnel into which the piston readily glides. The metal cap through which the piston-rod passes is retained in place by a bayonet catch. The removal and reinsertion of the piston are absolutely free from difficulty.

The advantages of this modification are the following:

1. The barrel can be filled from the top, fluid poured in, piston placed in position, syringe inverted, and the air expelled. This does away with the annoyance of trying to fill a syringe around the corner of the neck of a partially filled bottle, and it saves time when time is valuable.
2. It can be used as a tablet syringe, the tablet being dropped in from the top
3. All parts can be cleaned separately and rendered aseptic.
4. Should the leather ever become dry from disuse, it can be dipped in water and the edges ruffed outward by the finger, thus, without loss of time, putting the syringe into perfect working condition.

AN IMPROVED CLINICAL THERMOMETER.

[*Extract from New York Medical Journal, April* 24, 1886.]

The accompanying illustration represents Immich's metallic thermometer, the cut being of the actual size of the instrument. Its shape and size permit of its being readily carried in the manner of a watch, while its construction of metal, the covering of the dial only being of glass, does away with the liability of breakage—the great objection to the ordinary glass clinical thermometer. The action of the instrument depends upon the expansion or contraction of a metallic tube which is filled with a highly expansive liquid, and it is exceedingly sensitive, as can be demonstrated by the movement of the indicator under the influence of the slightest degree of warmth. The instrument is practically self-registering, as thirty seconds elapse before the indicator moves backward after a temperature has been taken. No shaking down is necessary, as it accommodates itself readily to an altered temperature. The figures on the dial represent both the Fahrenheit and Centigrade scales. The instrument, in a neat case, is for sale by Mr. W. F. Ford, of Caswell, Hazard & Co.

Price, silver, net, $10; gold, net, $22; Kew certificate for same, extra, net, 75c.

IMPROVED CAMMANN'S STETHOSCOPE.

From the Medical Record, 18th November, 1882.

The Cammann Binaural Stethoscope has been much improved by an ingenious device of Mr. Ford, of the surgical instrument department of Messrs. Caswell, Hazard & Co. One great objection to this instrument has been the manner in which the aural extremities have been kept in place in the meatus auditorii. The india-rubber band which was formerly used would exert too little or too great pressure, and noise was often produced by its vibrating in the expired air, and, moreover, it had often to be replaced. As a substitute for this, a spiral spring concealed in a tube was employed, but this, if not kept carefully oiled and clean, produced more or less noise. Mr. Ford has apparently surmounted these difficulties, and now presents a perfect instrument. The spring from which the requisite amount of pressure is obtained is concealed in the hinge which connects the aural extremities. No noises are now heard, and, as I say, the instrument is now apparently perfect in every way.
